

Doktar is an agritech company with a purpose of improving food systems through intensive use of data and data driven decisions. To fulfill its purpose, Doktar delivers a palette of digital services to the entire agricultural value chain. Doktar is positioned as a one-stop shop for digital agriculture solutions, which requires us to develop and deliver a set of services based on emerging technologies, such as remote sensing, internet of things, machine learning and artificial intelligence.

Interested in having a career in digital agriculture?

Doktar is actively in search for dedicated individuals to strengthen its team with the following capabilities:

- ◆ **Software Developers (.Net, C#, AngularJS, HTML5)**
- ◆ **Electrical Engineers**
- ◆ **Geomatics Engineers (remote sensing focus)**
- ◆ **Data Scientists**
- ◆ **Graduates from Math, Biology and Chemistry**

We have two offices, which are located in university technoparks; one in Istanbul Technical University and the other one in Ege University in Izmir. The positions are open in both offices, so please indicate your location preference in your application.

If you are interested in agriculture, new digital technologies and product development, please contact us by digital@doktar.com
